# The jury 2021

**Annika Persson**

Annika Persson has been diving since 1994 and started with underwater photography around 2004. She is a passionate diver and instructor working for Global Underwater Explorers. She enjoys a large range of different underwater environments, everything from shallow macro dives, to diving with sharks, diving on wrecks and in cave and mine environments. She has a few medals from the Swedish championships in underwater photography in addition to some good results from global photo shoot outs and competitions. Annika like photos with a clear composition, an appropriate level of detail as well as pictures where the photographer has shown some efforts of creativity.

**Rune Edvin Haldorsen**

Rune Edvin Haldorsen is a CMAS \*\* underwater photo instructor and has been photographing under water since 2005. He started photographing after joining his father in the darkroom developing films at the age of 10. During his career he has participated in different photo exhibitions with both underwater photography and other themes, making a few films for Norwegian TV2, NRK, BBC, and publishing photos in the major Norwegian newspapers, National Geographic websites and at the Glasgow Climate Panel. He represented Norway in the CMAS world championship in the Netherlands in 2015, Mexico 2017 and Madeira 2019. In addition to underwater photography, Rune has a passion for photographing polar landscapes.

**Kjetil Astrup**

Kjetil Astrup is a well-known name in underwater filming, and he is working as an underwater camera man in Cinemarine Norway. Kjetil C. Astrup has several large film productions and names in his portfolio. He is working with commercials, music videos, television, and film production. Some of the more famous sets he has been working on are Skam, Beforeigners, Twin, No Time to Die, Nordsjøen, The Birdcatcher and The Snowman. Last time we called him he was busy with BBC in Northern Norway.

## **Jury's general comment about this year's submissions:**

The level of photos and classes were very varied. In some classes, the winner photos were easy to choose, but in other, the jury had to use some more time due to the different styles and techniques. In general, the quality of images delivered in Nordic waters were better than in the other sub classes, but it was possible to find high quality top photos in all classes. In some of the classes in Baltic / freshwater and "other waters", the number of photos were so few that all photos were honored with points, even if the quality might have been lower than lots of rejected photos from "Nordic waters". In general, the photographers could have spent more time of solving the theme "Exploration". The jury had an impression of that quite a lot of the participants put some random photos into the class. This was also the class with the most significant deviation in the points given of the different jury members. The photographers are also advised to pay attention to environment and animal stress, even if it is not mentioned in the rules. Photos showing animals being moved has in general got a low score by the jury.
